Resilience in Healthcare Masterclass

A one and a half day course for researchers and health professionals who want to learn how to apply resilience engineering concepts to improve care quality and safety. Organised by the Centre for Applied Resilience in Healthcare (CARe) - a clinically embedded research centre.

7-8 May 2015, London, UK
Keynote speaker: Professor Erik Hollnagel
Registration fees: £250 or £200 KHP staff
Register via: http://resiliencecentre.org.uk/masterclass
For further info: masterclass@resiliencecentre.org.uk

This interactive masterclass will include:
- An overview of resilience engineering principles and quality improvement
- The latest learning from our resilience work in emergency care, medication safety, care of older people and clinical governance
- Interactive sessions with experts to learn how to apply a resilience approach
- Reflections on the benefits and challenges of applying resilience engineering

Participants are encouraged to identify a care quality problem they would like to address during the workshop with the assistance of resilience experts. CPD pending.
